

Slimline 100 Awning with Internal Gutter

Sleek, strong, and designed to perform.

The Slimline100 Awning is a modern solution for all-weather protection above windows and doors. With clean lines and smart drainage, It blends style with functionality.

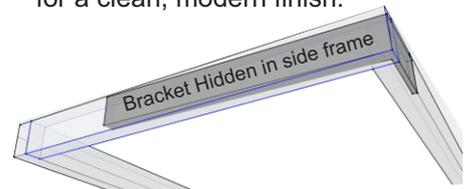

Fully welded 100x50mm aluminium frame – Powder coated for maximum protection and built to last.

10mm twin-wall polycarbonate sheeting
 – Installed inside the frame, it channels rainwater into the front gutter while allowing light in and reducing heat and UV.
 – Available in Solar White, Solar Silver, Grey, Bronze, and Clear

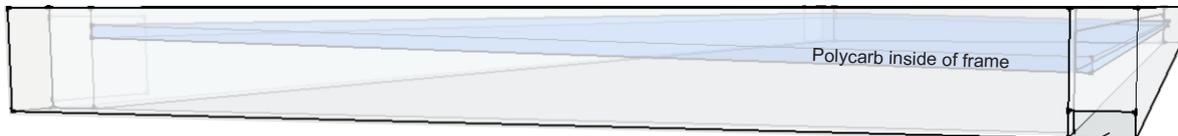

Hidden wall brackets

Concealed within the frame for a clean, modern finish.

Xray Vision.

Showing how the brackets are inside the frame.
